The Latest Scenario

There is no excuse now for education systems not to function properly, facing the pandemic **repercussions** .

Educational bodies ought to be ready, for this coming academic year.

Phase 2 of COVID-19 : Reopening Schools

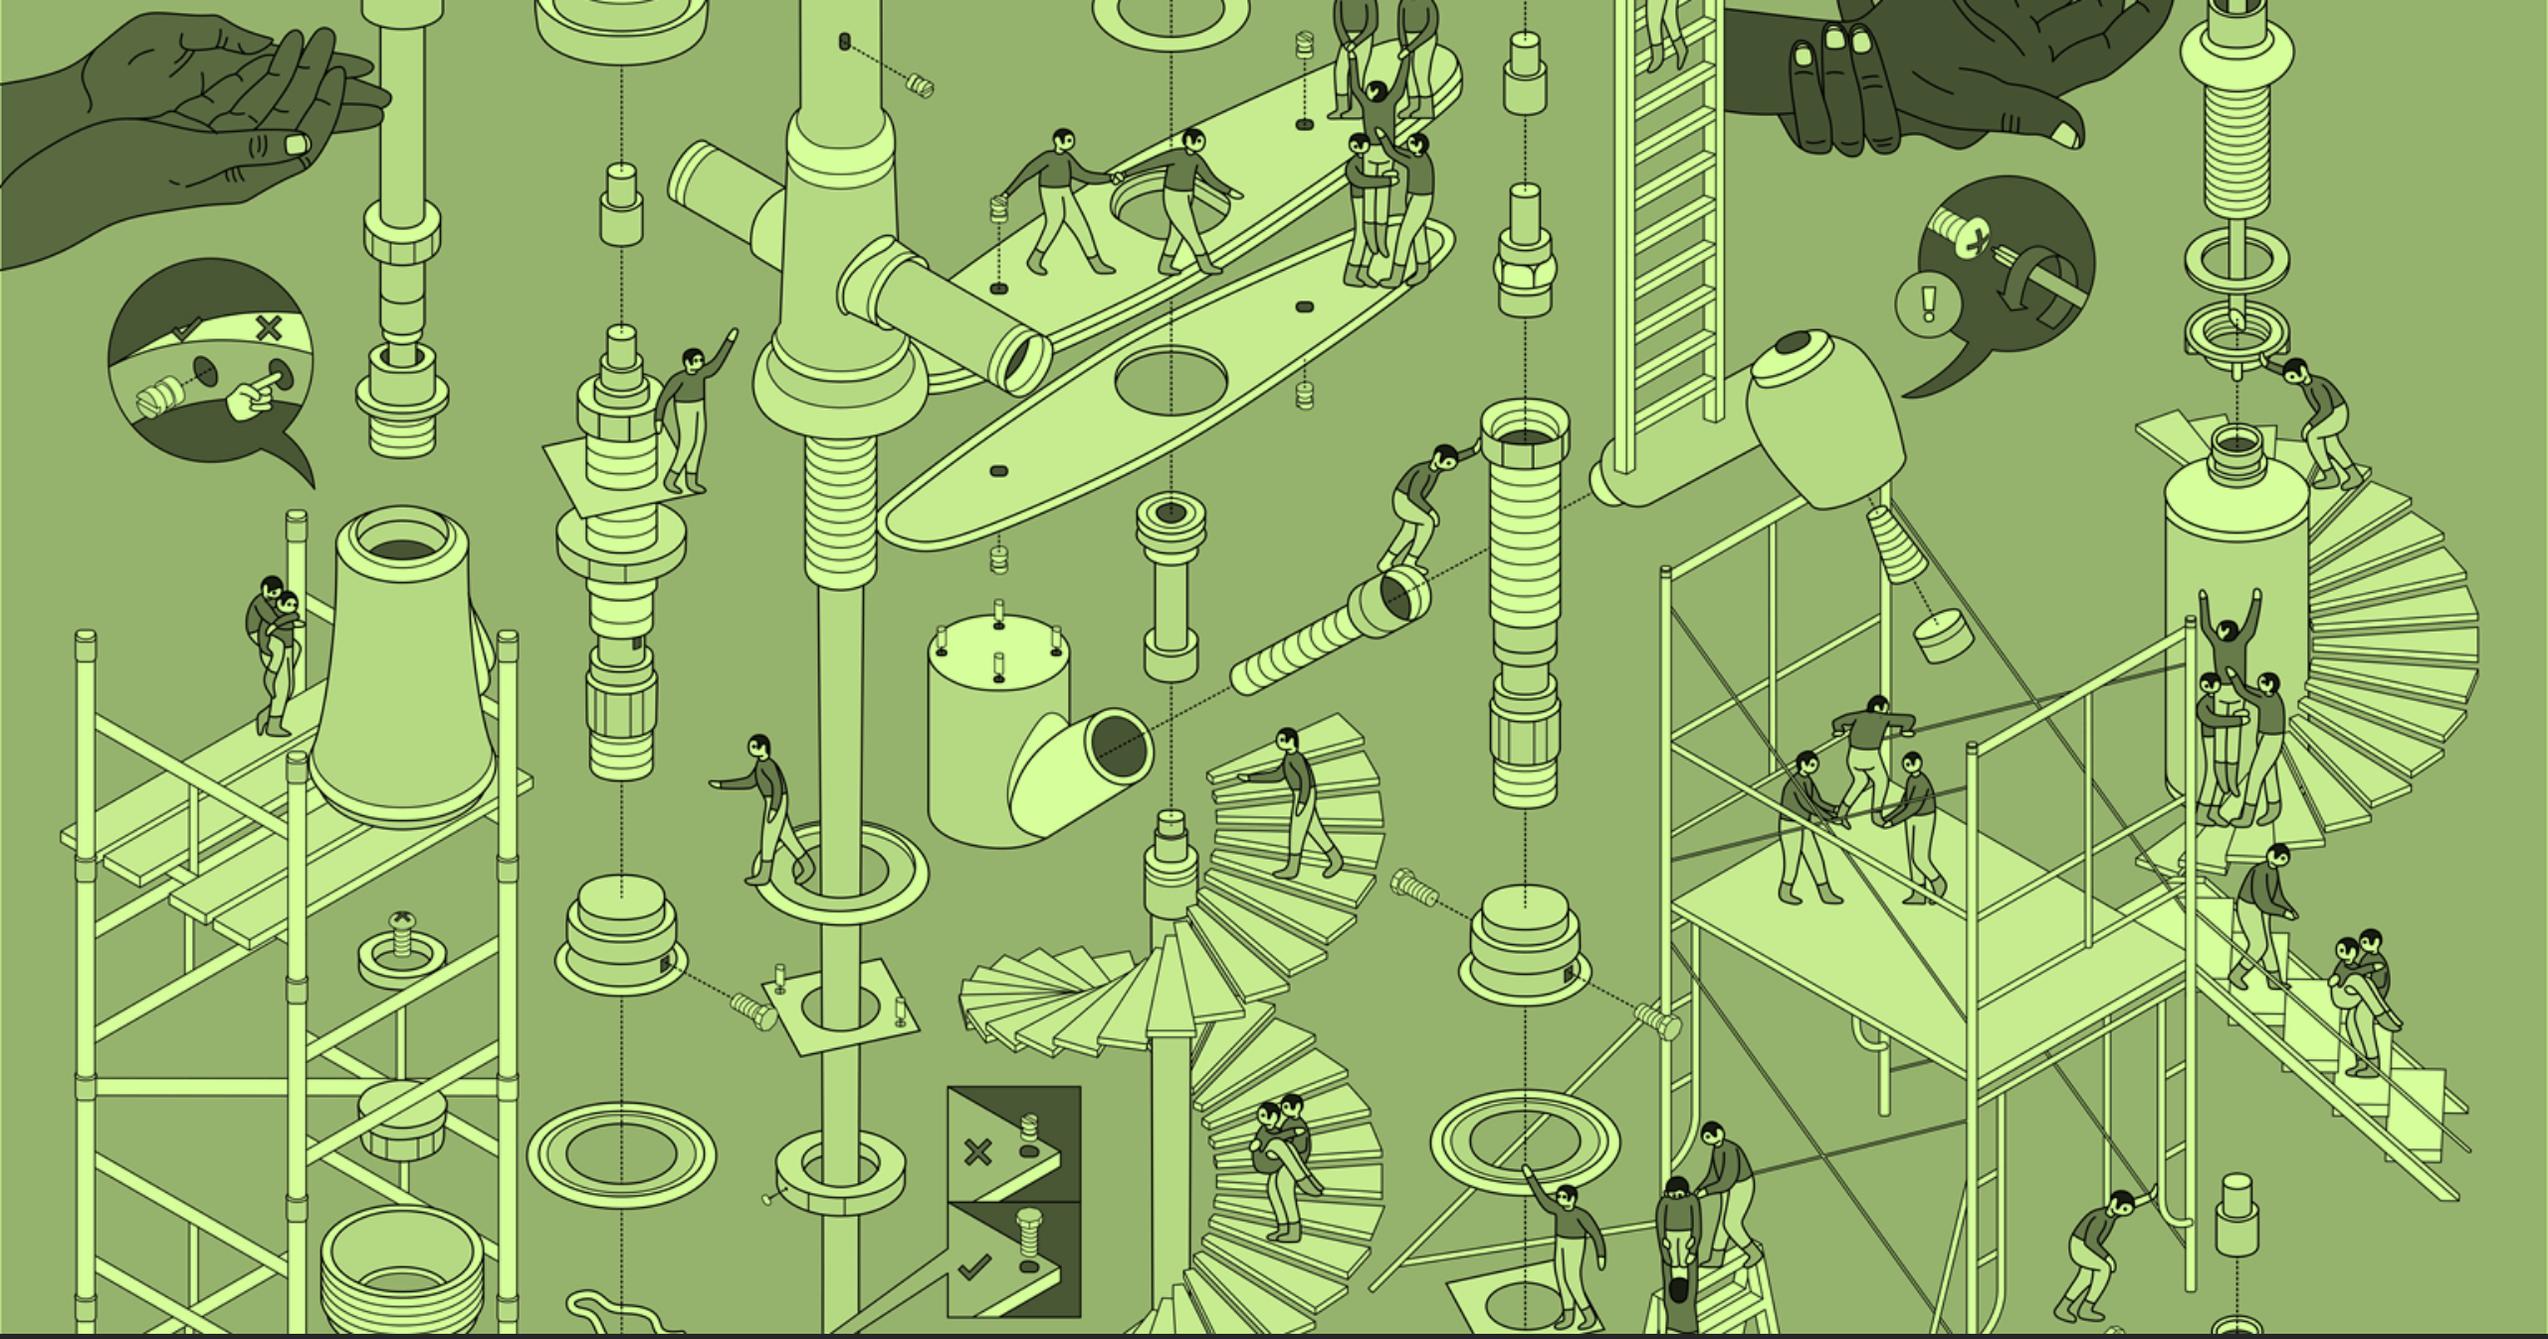

The previous (Post COVID Schools – Version 1) has presented the expected reopening of schools and the models of how such an era would be like, highlighting significant themes from safeguarding to contingency plans - Phase 1 of the COVID-19 effect upon schools.

This version 2, which starts phase 2, takes these to a higher level according to the updates of the pandemic and the beginning of an academic year with COVID still lurking at its footsteps. If learning will be on-site, then the main issue will be safeguarding and the two-meter distancing. Teaching and learning will be the same in the classes. This is though will not cancel the need of online sessions since on-site classes may not fully cover the requirements. It is important to note that for many schools distancing on-site means supplying more room space, even building or rearranging rooms. Schools are restructuring their physical surrounding for that purpose.

In case learning will be blended/hybrid or fully online, certain details are important to shed light on and reconsider carefully. Having a new delivery system for the curriculum is challenging and the teachers need all the preparation and support available.

The second phase of the pandemic will be as demanding as the first, and even more. Some countries faced objections from teachers for being forced to attend on-site. Others are ready with excitement, as they discover new realms in teaching. Either way, plans should have been set at all levels for the safety and performance of all stakeholders.

This phase cannot be done without using metrics in order to carefully assess and evaluate the entire process and the protocols.

General Safety Measures/Safeguarding

Focus Urgency Checkpoints

Full Checkpoint Lists that schools can use to evaluate these Focus Urgencies are available upon inquiry. Please send a message through www.orbitsdevelopment.com

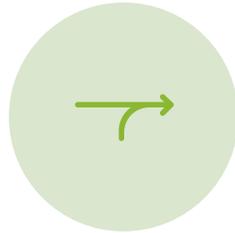

ACCOUNTABILITY

1

**ACADEMIC
ACHIEVEMENTS/LOSSES**

2

ALIGNMENT

3

INCLUSION

4

HOME COOPERATION

5

1. Accountability Showing full responsibility towards two major aspects: Safety and Learning S&L – safety in terms of having less infections among community and learning in terms of honest engagement in the learning process.

2. Academic Achievements/Losses After months of emergency learning and summer vacation, learning curves marked steep lines due to losses. The focus should be in this second stage at diminishing losses and amplifying gains.

3. Alignment Alignment with school statement- vision and mission- on the one hand, and more precisely, alignment with curriculum standards on the other. That's why it is crucial to revise and select, prune and enrich the action steps in the process.

4. Inclusion It is essential to include ALL learners in all school practices. Engagement of one means engagement of all. This includes instruction, assessment, and well-being.

5. Home Cooperation This is not optional now since learning is from home, too. Parents play an important role at such a stage. Parents need to see that learning cannot be done without some attention from them. Schools need to explain the process.

Instruction Modes (Fully Online or Blended Learning)

Rigid Schedule

This is a session-by-session timetable to ensure that the same recommended number of periods per subject matter is given to grade levels respectively. Usually in this case, live sessions are delivered (synchronous* manner).

Flexible Schedule

This depends upon schools and their systems respectively. These can be done through an overview of the day with all students/class. Then they are directed to certain prerecorded videos. Certain platforms, such as Seesaw, makes this easily accessible. Followed are discussion and task sessions. Zoom is helpful in this method because it provides the Breakout Rooms feature.

Tailored Schedule

This is planned to cater to learners with difficulties or those showing lack of full understanding of lessons.

Typical School Day

Suggestions

Indispensable Tools

These are **indispensable** as delivery media :

- Photos
- Videos
- Video Editing Software
- Online calendars to automate appointment and session scheduling, such as Calendly
- Platforms that incorporate high-engagement features (includes polls and interaction, such as Polly and Flipgrid)
- Breakout Rooms (online group meetings)
- Calls for small group or one-on-one meetings

Indispensable Services

These are **indispensable** as school services :

- ❖ Learning Support Teams (to help learners with difficulties or facing understanding challenges)
- ❖ Regular individual communication with parents (emails and surveys*)
- ❖ Mental Health coaches
- ❖ IT coaches
- ❖ Blended Instruction coaches

***Surveys** may be subjective. So **leadership** should control the results through accountability measures.

Necessary Skills - Learners

01

1. Time Management :
Learners need to practice
how to manage their time.

02

2. Self-Management:
Learning relates also to
managing one self- attitudes,
behavior, actions, reactions.
This surely varies by age and
environment.

03

3. Material Management:
Learners need to be reliable
since there will be times
when teachers are not
present to help with their
material.

04

4. Teamwork : Learners have
to learn to work in pairs or
groups from a home
perspective. Teachers can set
this at the beginning of the
year to make learning more
effective later.

05

5. Error Stress-Free : Such
unusual circumstances can
pose self-confidence issues
with learners from all levels.
Learning is open now. It is
not confined to classroom
walls. Explaining to them
that errors are part of the
learning will curb any
confidence loss.

Necessary Skills - Teachers

01

1. Time Management : Teachers need to teach children how to manage their time. This is essential at this stage.

02

2. Patience: Even after practice of online teaching and learning, teachers need to keep in mind the limitation of online reach.

03

3. Resilience : Tough times require the capacity to handle pressures and difficulties

04

4. Designing Feedback: This is essential to keep learners on track and it has to vary by grade and subject

05

5. Innovation : Technology is mandatory in such conditions. Being tech savvy is good. Being tech innovative is preferred.

Stay **safe and **ever-learning** !**

Preparations are almost ending in most countries, while it ended in others.

Schools will be reopening very soon in most countries, while it reopened in others.

Nothing is certain or fixed, but now we are ready.
